

**Dr. Damian Wojcik**, BSc MBCh DipObs DCH FIBCMT FACNEM FRNZCGP Master Forensic Medicine (Monash) FRCPA (Forensic) is a general practitioner; a clinical metal toxicologist, forensic physician and the Director of Northland Environmental Health Clinic at Whangarei, Northland, New Zealand. Dr. Wojcik graduated from Auckland Medical School, New Zealand, in 1979. As a forensic physician he has had 22 years' experience as a police medical officer. Dr. Wojcik founded the Northland Environmental Health Clinic (NEHC) in 2001, so as to explore a path to integrative medicine by combining scientific research, philosophy, spirituality and art together with compassionate service to his patients. NEHC has adopted a holistic model of healthcare that not only treats symptoms, but also seeks out and where possible remedies the underlying nutritional and environmental causes of illness. Dr WOJCIK has particular expertise in human mercury toxicology. He has a post graduate fellowship in Nutrition and Environmental Medicine from the Australasian College of Nutrition and Environmental Medicine (ACNEM), His current areas of active research are in metal toxicology, agricultural spray toxicity, and the biological effects of non-ionizing radiation, particularly radiofrequency EMR.
